

# Father's Day Toolbox

15 June 2014 is Father's Day! Make a cute toolbox card for your handyman dad today!

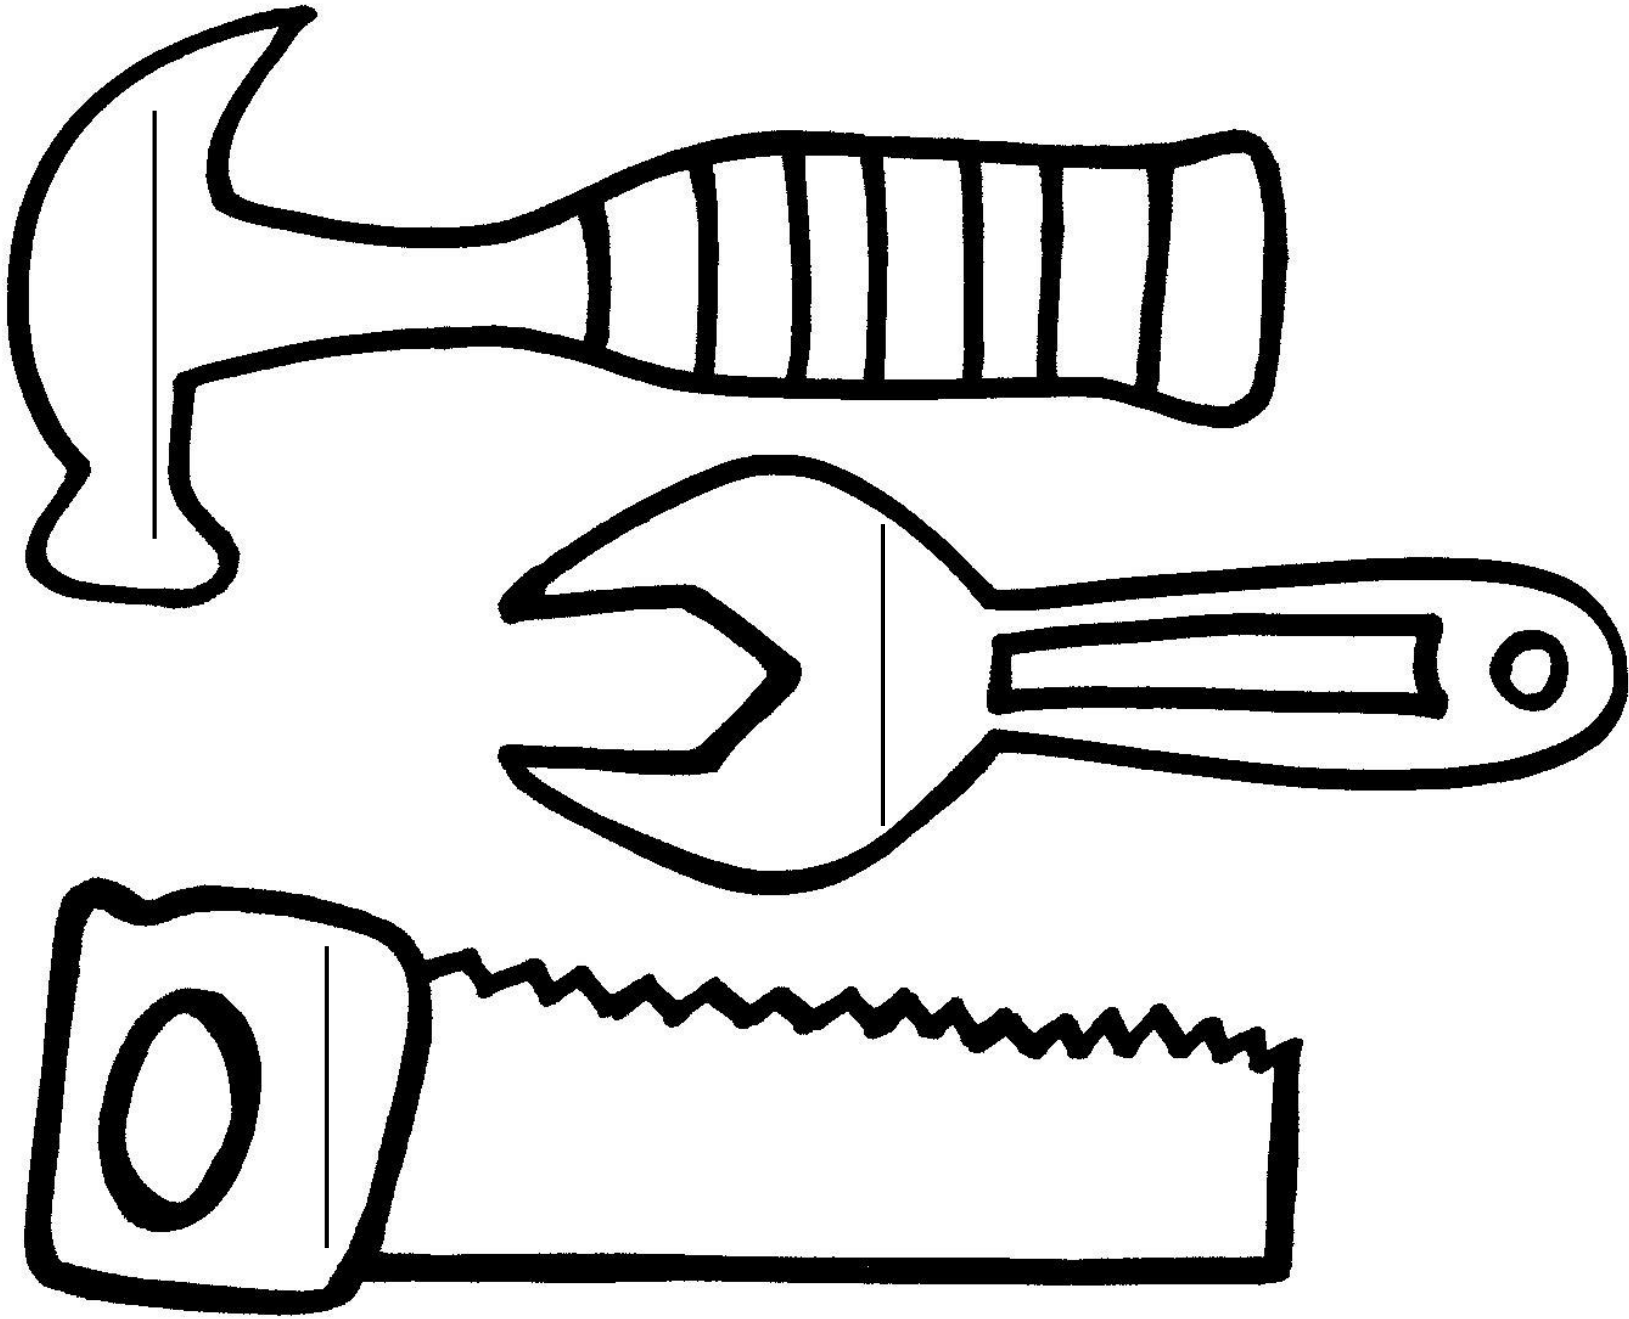

This activity will allow your child to:

- Perform simple fine motor skills like cutting jagged and curved lines, writing, colouring, etc.
- Describe his/her father using simple adjectives

Print the toolbox and tools template on thick paper; follow the instructions on them and start making your toolbox now!

Write an adjective that describes your dad on each tool. Colour and cut out.

Colour and cut out the toolbox. Cut a slit along the grey line. Slide the tools half way down into the slit along the toolbox.
